TRADE TENDER

CONNECT. COMPARE. CONSTRUCT.

tradetender.co.uk

Connect. Compare. Construct.

1. Brand foundation

Trade Tender connects construction clients with relevant retailers and suppliers through a controlled tender, quote comparison and contact-release workflow. The identity is designed to feel dependable, direct, efficient and construction-ready, while retaining the clarity expected of a modern SaaS platform.

Positioning

A practical, UK-wide construction quote marketplace that simplifies sourcing without looking like a consumer lead-generation site. The brand should communicate control, speed and commercial trust.

Primary audiences

Clients include contractors, site managers, developers, facilities teams and property businesses. Retailer audiences include plant hire, materials, waste, logistics, trades and specialist subcontractors.

Brand personality

Reliable • Direct • Trade-focused • Efficient • Professional

2. Logo system

The symbol combines a letter T, structural geometry and forward movement. It provides a compact mark for digital products while the wordmark remains authoritative in formal communications.

Primary lockup

Use for covers, proposals, signage and high-impact brand moments.

Horizontal lockup

Default for websites, email headers and document headers.

Stacked lockup

Use where space is narrow or centred.

Icon / app mark

Use for favicon, app tile, avatar and compact UI

navigation.

Logo usage rules

- Maintain clear space equal to the width of the central symbol stroke on every side.
- Minimum recommended width: 32 mm in print for the horizontal logo; 140 px on screen. Use the icon below that size.
- Use full colour on white or very light backgrounds, reversed white on navy or blue, and monochrome only when colour reproduction is unavailable.
- Never stretch, rotate, recolour individual elements, add shadows, place over busy imagery, or alter the relationship between symbol and wordmark.

3. Colour system

Colour	Hex	Use
Navy	#0D1B2A	Primary corporate base, navigation, formal documents
Trade Blue	#1D6FB8	Links, secondary actions, data highlights
Sky Blue	#6EB1E4	Supporting accent and digital gradients
Steel Grey	#6B7280	Secondary text, borders and neutral UI
Light Grey	#F2F4F7	Backgrounds, forms and panels
White	#FFFFFF	Negative space and reversed applications
Safety Orange	#F28C28	High-priority calls to action only
Success Green	#2E7D32	Completed and accepted states
Warning Amber	#D97706	Pending and action-required states
Error Red	#B91C1C	Failure, rejection and validation errors

4. Typography

Primary: Montserrat for brand-led headings and campaign display. Operational fallback: Aptos Display. Secondary: Source Sans 3 for interfaces and long-form reading. Operational fallback: Aptos.

- Headlines: concise, sentence case, bold.
- Body copy: plain English, short paragraphs and clear labels.
- Use tabular numerals in dashboards and quote comparisons where available.
- Avoid condensed novelty fonts or industrial stencil typefaces.

5. Tone of voice

Clear, direct, helpful and practical. Explain the next action, the fee and what information becomes available. Avoid inflated claims, vague promises and unnecessary construction jargon.

Prefer	Avoid
Create a tender	Start your procurement journey
Unlock full details	Purchase lead access
Compare quotes	Evaluate vendor propositions
Payment complete	Transaction successfully facilitated

6. Application guidance

Website and SaaS

Navy sidebar; white content field; Trade Blue links; Safety Orange reserved for decisive actions such as Unlock or Accept.

Business documents

Horizontal logo in header; navy titles; blue rules; generous white space; restrained use of construction imagery.

Tender and quote records

Use clear status labels, tender identifiers and quote identifiers. Colour must support labels, never replace them.

Email

Horizontal logo at a compact size, one clear call to action, accessible body text and a plain-text legal footer.

Workwear, vehicles and signage

Use the icon with horizontal wordmark. Prefer navy, white and one blue accent. Keep artwork simple enough for embroidery and vinyl.

Social and advertising

Use the icon as the avatar. Campaign graphics should lead with a practical benefit and one action, not decorative trade clichés.

7. Accessibility and governance

- Check text and button contrast before release, especially blue or orange on white.
- Do not rely on colour alone to indicate tender, payment or quote status.
- Keep a single approved master logo folder and prevent teams from recreating the mark.
- Partner and advertising branding must remain visually separate from tender ranking, quote comparison and supplier selection.
- Review the identity after real-world testing across desktop, mobile, printed documents, signage and email clients.
